## LCA information

### Declared unit:

1 item of Lusso shower enclosure (58.587 kg)

### Time representativeness:

The data used to model product manufacturing corresponds to year 2021. The data from generic databases are from 2015 - 2022. No data used is older than 10 years.

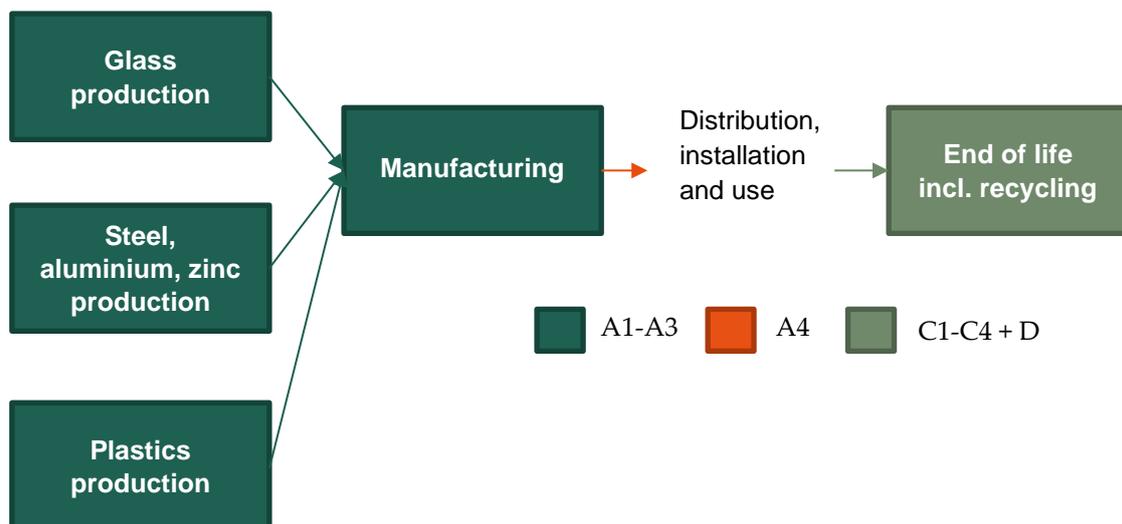

### Database(s) and LCA software used:

Databases used are the Sphera's Managed LCA Content (version 2023.1). The LCA software used is LCA for Experts (version 10.7).

### Description of system boundaries:

Cradle to gate with options, modules C1-C4, module D and with optional module A4.

### System diagram:

Tempered glass, steel, aluminium, zinc and plastics (polyamide, polyvinylchloride, acrylonitrile butadiene styrene, ethylene-vinyl acetate), are transported to a manufacturing plant where shower enclosures are manufactured. The shower enclosures are transported to a central warehouse from where they are distributed to the final customers. After use the product is transported to waste processing, is manually disassembled and different materials are treated in their respective way.

Modules declared, geographical scope, share of specific data (in GWP-GHG indicator) and data variation:

The results presented reflect the material composition of one specific variant given that the variation between the best and worst case was higher than 10%.

Allocation:

Weight allocation has been applied to allocate the manufacturing data, delivered for the complete plant, to 1 item of Lusso shower enclosure.

Data quality:

Site-specific manufacturing data has been retrieved from the manufacturer. The upstream and downstream processes have been modelled based on generic data from databases. The collected data was reviewed according to EN 15804 and is deemed as of good quality.

Cut-off criteria:

The maximum cut-off criteria established by the PCR is 1% of all material and energy flows to a single unit process and 5% of total inflows (mass and energy) per module, e.g. per module A1-A3, A4, C1-C4 and module D. No cut-offs exceeding this limit have been made.
